

National Radiologic Technology Week 2022

November 7-18, 2022
Online

Canon Medical is recognizing the vital work of medical imaging and radiation therapy professionals by offering complimentary continuing education courses. These courses will be available to access online at no charge from Monday, November 7th to Friday, November 18th, so be sure to mark your calendar! For more information, call 1-866-858-8724.

Improving Workflow and Productivity with Communication

Good communication skills can positively influence workflow productivity, minimize errors, and produce better images. This course will review best practices for improving interpersonal and digital communication skills in multi-generational and diverse environments.

Course Number *GEN4900*
Number of Credits *1 CE*

CT Cardiac Best Practices

Join us as we utilize clinical scenarios to illustrate CT cardiac imaging workflows. This course aims to familiarize the technologist with best practice in cardiac acquisition modes and image reconstruction.

Course Number *CTM3050*
Number of Credits *0.5 CE*

MR ACR Phantom Troubleshooting

In preparing to image the ACR phantom, the ACR has given 8 tests to evaluate a system's performance. This training covers some of the more common troubleshooting scenarios a site may encounter when submitting their data.

Course Number *MRM3500*
Number of Credits *2 CE*

Hybrid Imaging Then and Now

The objective of this course is to educate learners on the history and evolution of hybrid imaging as well as the clinical applications of Multi-Modality Fusion. Participants will also be educated on Canon's 4D CT product, and how it contributes to the realm of hybrid imaging.

Course Number *VLM3055*
Number of Credits *0.5 CE*
